@ <mailto:mohatt@pm.me>

Full-stack engineer specializing in **Node.js**, **TypeScript**, and **GraphQL**, with front-end expertise in **React** and **Angular**. Over **8 years** of delivering production web apps from **UI** to **APIs** and **CI/CD**, with a focus on performance, reliability, maintainability, and developer experience. Open-source contributor, passionate about building software.

Highlights:

- Owned GraphQL microservices within an Apollo Federation supergraph.
- Integrated an AI-powered product-recommendation service into a grocery delivery app.
- Built Stripe operations dashboards (charges, refunds, transfers, payouts) with reconciliation.
- Scaled web apps/back ends to thousands of requests per minute with low latency.

EXPERIENCE

See full history: <https://mohatt.web.app/resume>

Full-Stack Engineer — Freelance · Part-time · Remote

2014 — Present

- Delivered end-to-end web apps for startups/SMBs—from microsites/MVPs to large applications.
- Designed application-focused cloud on AWS, GCP, and Firebase—serverless-first, low-ops, scalable.
- Built React/Angular apps and Node back ends; integrated APIs, auth, payments, AI, and webhook flows.
- Established CI/CD pipelines and automated unit/E2E tests (GitHub Actions; Jest/Vitest, Cypress/Playwright).
- Provided technical consulting: architecture/code reviews, tooling, performance, and developer workflows.

Full-Stack Engineer (Node.js/TypeScript) — Mishe · Full-time · United States (Remote)

2024 — 2025

- Modernized legacy Firebase project: upgraded Node.js to LTS; refactoring; cleaned deps and improved repo/DX.
- Migrated the internal dashboard to Material UI; built reusable components and standardized UI patterns.
- Organized Firestore data with a schema analyzer and dashboard-driven migrations runner integrated into CI/CD.
- Built Stripe operations dashboards (charges, refunds, transfers, payouts) with reconciliation and audit logs.
- Set up CI/CD with GitHub Actions + Cloud Pub/Sub: PR checks, staged deploys, and in-dashboard deployment logs.
- Quality & reliability: unit/E2E tests on PRs; structured logging/observability; caching and load tests for speed.

Full-Stack Engineer (Node.js/TypeScript) — JOKR · Full-time · United States (Remote)

2021 — 2024

- Owned NestJS/GraphQL services in Apollo Federation; delivered end-to-end features, releases, and monitoring.
- Built internal React/MUI dashboards and component libraries; streamlined operations and accelerated delivery.
- Built an AI-powered recommendations service from user signals; integrated into the GraphQL API and dashboards.
- Boosted performance via caching/batching (DataLoader), pagination, and load tests; sustained high load times.
- Set up CI/CD pipelines with GitHub Actions + Terraform: PR previews and Docker/Kubernetes/Helm deployments.
- Quality & reliability: 90%+ test coverage; Datadog + runbooks reduced MTTR; Auth0/JWT hardened access controls.

Full-Stack Engineer (PHP/WordPress) — Point Hacks · Part-time · Australia (Remote)

2016 — 2018

Full-Stack Engineer (PHP/Symfony) — Dimentians · Full-time · Canada (Remote)

2014 — 2016

SKILLS

See full list: <https://mohatt.web.app/skills>

Soft Skills & Practices — Problem-solving · Decision-making · Systems thinking · Communication · Organization · Test-driven development (TDD) · Code reviews · Clean architecture · Documentation

Recently used — Node.js · TypeScript · NestJS · Express.js · MongoDB · Redis · Apollo GraphQL · Google Cloud · Firebase · React · Angular · Vite · Material UI · RxJS · Stripe.js · Auth0 · Vitest · Playwright · Docker · GitHub Actions

Also used — PHP · Python · Shopify · MySQL · PostgreSQL · Elasticsearch · Amazon AWS · JavaScript (ES6+) · Gatsby · Next.js · Tailwind CSS · Bootstrap · Webpack · Jest · K6 · Cypress · Kubernetes · Terraform

EDUCATION

Formal degree with self-directed CS foundation and ongoing coursework

Selected Online Coursework — Professional development (various providers) 2015 – Present
AI Agents with MongoDB (2024) · Eloquent JavaScript (2024) · GraphQL Essentials (2020) · Advanced React (2018)

CS50x: Introduction to Computer Science — HarvardX (edX) — Online program 2016 – 2017
C · Python · SQL · Algorithms · Cryptography · Data Structures · Security

Misr University for Science and Technology — B.Sc. in Physical Therapy 2010 – 2016

PORTFOLIO

See more projects: <https://mohatt.web.app/projects>

JOKR — Smart grocery shopping powered by AI

Federated GraphQL platform + AI recommendations for a fast grocery delivery startup.

React/MUI dashboards; Datadog observability; high-throughput, low-latency GraphQL.

Case study: <https://mohatt.web.app/projects/jokr>

TESTIMONIALS

What clients and colleagues say (*references available on request*)

“Mohamed’s been an invaluable part of the JOKR product and tech team. He delivered reliably, raised the bar on code quality, and provided clear guidance on integrating our back-end services and improving API security.”

Gabrielle Charnoff
Senior Director & PM, JOKR

“I liked working with Mohamed because he is a true professional. He not only delivered excellent work on time; he also looked beyond the brief to understand our needs and did everything necessary to make it easy for us. Highly recommended!”

Han Gerrits
CEO, KPMG Innovation Factory

“I highly recommend Mohamed. Although he started as a freelancer, he integrated seamlessly with our team, delivered full-stack features end-to-end, and was proactive across time zones. Meticulous and test-driven, he shipped stable, reliable code and supported other engineers.”

Ben Chen
VP of Engineering, JOKR

“Mohamed is a talented developer with a strong technical background and the ability to quickly identify the right solution to tough challenges. His willingness to dive into new areas and learn fast made working together a pleasure.”

Keith Mason
Founder, Point Hacks
